DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities:

page 11, line 1, "189" should be --180--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12, line 5, "a signal layer operable coupled to the ground layer" is not clearly understood. Claims 12-15 are not considered over the prior art because of 35 USC 112 problems.

Claims 13-15 are included because of their dependencies.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 2831

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Alexander.

Alexander disclose the invention as claimed including at least three ground layer (49), at least one power layer (PWR), at least two signal layers (SIG), a through holes for mounting a frame, socket (21), a plurality of vias (45, 55) (Fig 3) and capable of functioning as claimed.

Response to Arguments

Applicant's arguments filed 11-20-2002 have been fully considered but they are not persuasive.

Applicant argues (1) that the ground layer do not cover the signal layers. The examiner disagrees. With respect to (1), the ground layers (49) of Alexander cover substantially all of any portion of the at least two signal layers (SIG).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR

Art Unit: 2831

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
